

BeamPro

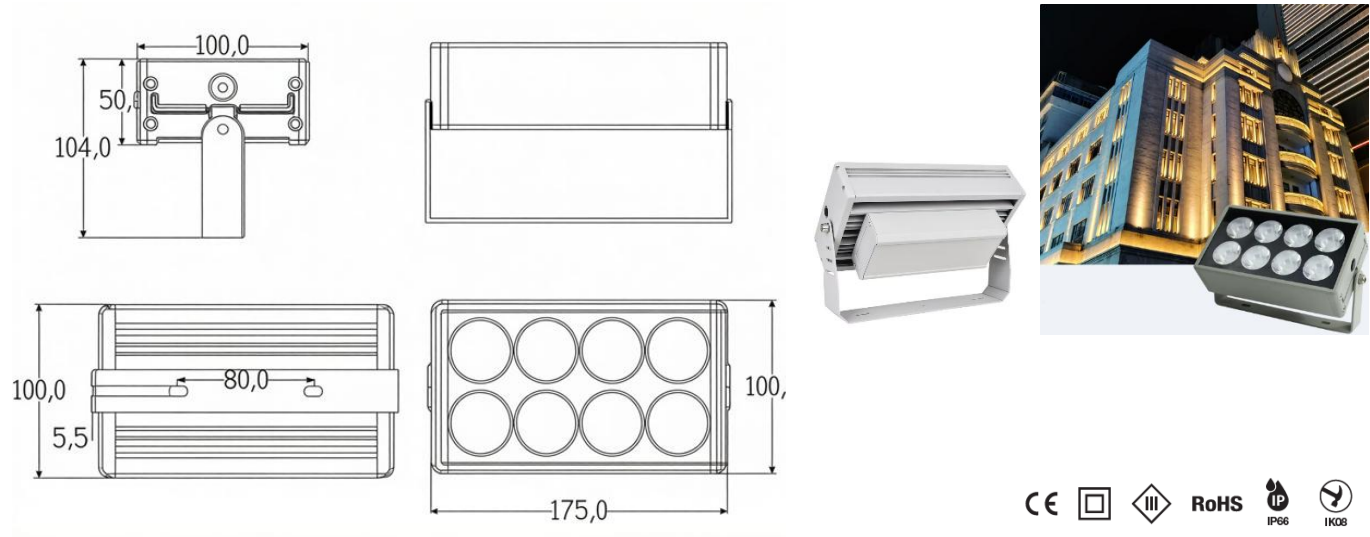

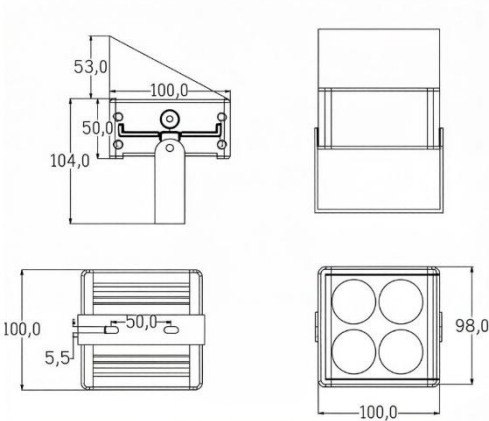

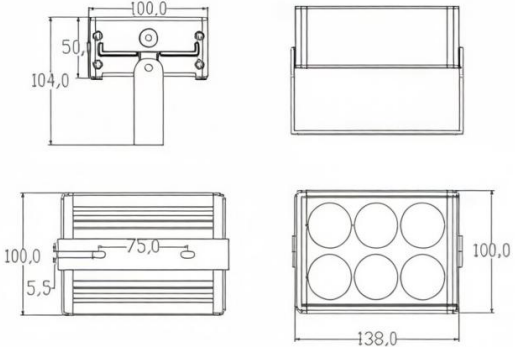

Constructed from a die-cast aluminum alloy housing and tempered glass, this LED floodlight ensures superior durability and safety. It is offered in four sizes and two styles: a **Glare Shield** version for precise lighting control or a **Bare** version for maximum brightness. Beyond standard black, white, and gray, the finish can be fully customized according to **RAL codes**, as well as special finishes like wood grain and stone effects to match any architectural aesthetic.

Lighting is highly flexible: choose from **2700K–6500K CCT**, Red/Green/Blue, or dynamic **RGB/RGBW**. Compatible with **DMX512** digital control, it creates stunning color-changing effects, making it perfect for architectural facades, landscapes, and smart city projects.

- 4 Sizes Available
- 50,000 hours
- Housing: Aluminum
- Optics: Tempered Glass
- Options of Glare Shield

Size	Power	Lumen	CCT
100x100	12W	950lm	2700K/
